

Parents Guide: Dinosaur Maze (Hard)

Did you know?

- Did you know dinosaurs laid eggs, just like birds and crocodiles do today?
- Some dinosaurs, like Maiasaura (which means 'good mother lizard'), took great care of their babies in the nest.
- The eggs of giant dinosaurs were not that big, because otherwise the shell would have been too thick for the baby to break through.

Play Idea for Home

Build your own little maze in the living room using pillows and stuffed animals.

Conversation Starter

Do you think dino moms sang songs to their babies?

Mini Quiz

Which dino is also called 'good mother lizard'?

Answer: The Maiasaura
